Objective

Backend Engineer specializing in Java Spring Boot and microservice-based architecture, passionate about designing scalable, secure, and high-performance systems. Seeking opportunities to contribute to robust backend development and distributed systems.

Key Skills

Programming & Frameworks: Java, J2EE, Spring Boot, Microservices, WebFlux, REST

Databases: PostgreSQL, MongoDB, DynamoDB, Redis

Tools & Cloud: Git, AWS EC2, AWS S3, AWS RDS, AWS CloudWatch, Maven, Docker, Jenkins, Kubernetes

Performance & Reliability: Kafka, Resilience4j, Load Balancing, SLF4J, Log4j

Security & Authentication: OIDC, LDAP, OneLogin, JWT

Testing & CI/CD: JUnit, Mockito, Integration Testing

Professional Experience

Systems Engineer Tata Consultancy Services (TCS)

Sep 2023 – Present

- Designed and implemented a reactive data pipeline using **Spring WebFlux** with near real-time streaming (**2-minute polling**).
- Built an **event-driven architecture** using **Apache Kafka**, enabling scalable and decoupled data processing.
- Optimized system performance using compression and caching with **Redis**, improving throughput and reducing latency under high load.
- Re-engineered legacy **SOAP APIs** into **RESTful services**, reducing response time by **30–40%** while improving scalability and maintainability.
- Led migration of authentication system to **OneLogin**, securely migrating **110K+ users** while supporting concurrent onboarding with zero downtime.
- Improved code quality and maintainability by conducting peer code reviews and enforcing standards using **SonarQube**, reducing code smells and vulnerabilities.

Technical Projects

Distributed Log Aggregator Service [Link]

Sep 2025 – Dec 2025

Java, Spring Boot, MongoDB, Redis, Elasticsearch, Nginx, Resilience4j

- Designed and developed a centralized **log aggregation system** to collect and store distributed microservice logs.
- Implemented **Redis-based error channel** for fast retrieval and debugging operations.
- Integrated fault tolerance using **Resilience4j** and secured endpoints with **Nginx API Gateway**.
- Developed a **Search API with Elasticsearch** to enable high-speed log queries and visualization.
- Focused on system scalability, resilience, and **low-latency performance optimization**.

Education

Master of Computer Applications (MCA)

Babu Banarasi Das University, Lucknow

2021 – 2023

Bachelor of Computer Applications (BCA)

University of Lucknow, Lucknow

2018 – 2021
